

WEEK SIXTEEN

The Abortion Breaks Tiny Hearts Campaign

At four months, Mom may start to feel her baby moving for the first time, the “quickening.” If she goes in for an ultrasound and the baby’s cooperating, she might also learn her baby’s sex. Her baby is experiencing new sensations as well. Taste buds are developing and she can sense light. Though her body’s only four-and-a-half inches, her heart is pumping twenty-five quarts of blood a day.

Quickening
