

WEEK TWENTY-FOUR

The Abortion Breaks Tiny Hearts Campaign

Amillia Sonia Taylor, “the world’s youngest premature baby ever,” survived birth at just 21 weeks and six days, but the given age for viability is usually considered to be 24 weeks. At this point his chance for survival is between 40-70%. Crucial to this survival is the development of his lungs. Right now they’re beginning to make surfactant, a substance that will help him breathe outside the womb.

Viability
